E. WOLFF & SONS' newly-invented CRETA LÆVIS, or PERMANENT DRAWING CHALKS, in cedar, in every variety of colour.—E. WOLFF and SONS beg to state that they have, by the introduction of great improvements in their CRETA LÆVIS, enabled it to be used the same as the ordinary pencil; and effects can now be produced equal to water-colour drawings, without the use of water or any other fluid; the various colours blending together with perfect harmony, beauty, and richness. It can be cut to a fine point, and is thus capable of giving a very delicate outline. For sketching from Nature, the great advantages resulting from the adoption of the CRETA LÆVIS must be obvious, as, without the use of water, palette, brushes, &c., all the various tints can be obtained with a truthfulness that cannot be surpassed, and by their compact form may be carried any distance without the slightest inconvenience; thus superseding every other method in general use. The drawings may be carried in a portfolio with safety, as, unlike other crayons, they will neither rub off nor suffer injury by coming in contact with the usual contents of a portfolio. The CRETA LÆVIS, unlike the indelible or wax crayons, WILL NOT BE AFFECTED BY HEAT OR CHANGE OF CLIMATE.

E. WOLFF and SONS' IMPROVED CRAYON PAPER is the best for the CRETA LÆVIS. To be had of all Artists' Colourmen and respectable Stationers, in leather boxes, containing sets of 12, 18, 24, 36, 48.—A Pattern Card, containing the whole of the shades and colours of the CRETA LÆVIS, with their names and numbers attached to each shade, price 1s. each. CAUTION.—As there are several spurious imitations, it is necessary to observe that every Pencil is stamped, "CRETA LÆVIS, E. WOLFF and SONS," London, with name of the colour.—Creta Lævis Drawings lent to copy at C. E. CLIFFORD'S, 30, Piccadilly.

SEWERAGE of LONDON.—The attention of the COMMISSIONERS appointed to determine upon the most efficient material for the Construction of the Sewers of London is particularly directed to the ASPHALTE of SEYSSEL, which, more than any other material, is applicable to the constructing and internal coating of Brick Culverts, and other channels for drainage. The experiments made by the Royal Artillery on the Embrasures of Plymouth Citadel, constructed of Seyssel Asphalted Brickwork, under the orders of the Honourable Board of Ordnance, have fully proved the superiority, adhesiveness, and strength of Seyssel Asphalte over all other cementitious compositions. A printed account of these experiments can be had on application to J. FARRELL, Secretary, Seyssel Asphalte Company, "Claridge's Patent." Established 1838.

Note.—The application of the Asphalte of Seyssel is specially recommended by the Commissioners on the Fine Arts, for covering the ground line of brickwork in marshy situations, and it has been suggested that it would be peculiarly applicable for covering the Areas of closed Graveyards, and for the construction of catacombs.
